

YOUR INNOVATION ENGINE NEEDS A POWERFUL IT AUTOMATION ENGINE

No matter what your business, you're in the software business. Technology is your innovation engine, and delivering your applications faster can help you win. Historically, that required a lot of manual effort and complicated coordination. But today, there is Ansible—the simple, yet powerful, IT automation engine that thousands of companies are using to drive their DevOps initiatives.

AUTOMATION CREATES TIME

Let's be honest: repetitive tasks should be automated. With Ansible automation, one admin can learn Ansible quickly and manage two, three or even four times as many machines as they could manually. That extra time and effort can now be spent on new initiatives, new upgrades, or new applications. Ansible helps your existing team scale to tackle new things by freeing them from mundane things.

ANSIBLE AS A SECOND LANGUAGE

No matter where you are in the organization, or how technical—Ansible gives you a common language to describe your IT infrastructure. It's easy-to-learn, self-documenting and doesn't require a grad-level computer science degree to read. Automation shouldn't be more complex than the tasks it's replacing.

COMMUNITY POWERED

Ansible is the most popular open source automation tool on GitHub today with more than a quarter million downloads per month. With over 1,100 contributors submitting new modules all the time, you can rest assured that what you are trying to automate is covered in Ansible already, or will be soon.

"Ansible is amazing. It's already allowed us to save at least 10-15 hours per week managing our systems."

ENTERPRISE READY

Ansible Tower allows you to harness the powerful Ansible automation engine in your enterprise. Tower adds the control, security, auditability and delegation features that allow you to operationalize automation throughout IT. Provision new systems. Configure and update existing machines. Deploy new applications. Perform rolling upgrades with zero downtime. No matter what you are trying to accomplish, Ansible is up to the task—and Ansible Tower is there to control and secure it all.

Thousands of companies are using Ansible to innovate faster. What are you waiting for? From provisioning in the cloud, to configuration management, to application deployment, to complex environment orchestration. When your team has the power of Tower, they can automate—and your business can innovate.

“Ansible Tower has allowed us to provide better operations and security to our clients. It has also increased our efficiency as a team.”

Simple

- Uses YML for playbooks
- No special coding skills needed
- Fast learning curve

Agentless

- Uses OpenSSH
- No extra code to manage
- Ready for cloud-scale

Powerful

- App deployment
- Orchestration
- Configuration management

◀ Ansible Open Source

Ansible Enterprise Automation

Ansible Tower ▶

Control

- Centralized job runs
- Job scheduling
- Automation dashboard

Security

- Role-Based Access Control
- Delegation of credentials/keys
- Audit trail for automation

Delegation

- Push-button job execution
- Delegation of credentials and keys
- Surveys for easy job configuration

ANSIBLE TOWER IS THE BEST WAY TO RUN ANSIBLE IN YOUR ORGANIZATION
