

# Puppet Enterprise for Government

Both private sector and government organizations are increasingly challenged to prioritize resources and deliver on mission goals while meeting stringent security and compliance requirements. Managing these challenges is where Puppet excels. Puppet Enterprise helps defense, intelligence and civilian agencies address security and compliance requirements, manage heterogeneous environments, and get immediate and ongoing visibility into IT infrastructure. Plus, Puppet Enterprise lets you easily automate repetitive tasks, quickly deploy critical applications, and proactively manage infrastructure across all major operating systems, whether on premise or in the cloud.

- Enforce security policies, define desired state and automatically monitoring changes against that baseline.
- Avoid configuration drift, enforce your desired state, and ensure you're meeting regulatory requirements.
- Minimize risk by testing patches before rolling them out.
- Manage thousands of nodes with minimal effort.

## Puppet Information

**SIC Code** 7372  
**NAICS Code** 511210

## Other Designation

**GSA Contract** GS-35F-0524Y  
**Cage Code** 5YM55  
**DUNS Number** 627008373  
**CON** 11757  
**NASA** SEWP GWAC

U.S. AIR FORCE

## We work with the world's most innovative & respected agencies

Puppet Enterprise is the preferred solution among federal agencies and contractors looking to manage their IT infrastructure with unmatched agility, efficiency and insight. Puppet can provide you with full implementation, training and support services to help your team adopt our solution quickly, and deliver the resources you need for your mission.

The Puppet Forge offers more than 3,900 modules that automate a wide range of system administration tasks. The NSA has released Puppet modules to enforce NIST SCAP profiles; Army-ALTESS plans to release its own Puppet modules for managing STIG machines; and the Consumer Finance Protection Bureau plans to release its own STIG modules.
