

Cloud-Native visibility + security for Red Hat OpenShift.

Deliver the benefits of cloud-native faster, with less risk.

UNIFIED MONITORING + SECURITY

Get insight into performance and security together, to more effectively deliver secure, reliable micro-services on OpenShift Container Platform.

DEEP INSIGHTS

Tap into the industry's richest data sources for full-stack OpenShift monitoring and security including syscalls, Falco, Prometheus, JMX, StatsD, and Istio.

MULTI-CLUSTER MULTI-CLOUD

See your entire OpenShift estate in one place. Compare and contrast metrics from any number of clusters across on-prem and public cloud deployments.

ENTERPRISE SCALE

Operate at scale with full HA for fast growing environments. Ingest as much as 100M+ metrics per second and maintain data long-term for trend analysis.

FASTER TROUBLESHOOTING

Accelerate incident response, forensics, and troubleshooting with deep granular system captures to reduce the impact of unexpected issues.
